

## Regulatory Reform under Executive Order 13771: Final Accounting for Fiscal Year 2018

This chart summarizes government-wide compliance with [Executive Order \(EO\) 13771](#), which requires federal departments and agencies to: (1) eliminate two regulatory actions for each new regulatory action; and (2) not exceed a regulatory cost allowance. For fiscal year 2018, this regulatory budget was set individually by agency, with the instruction to propose, consistent with legal obligations, an overall reduction in regulatory costs (see OMB guidance [M-17-31](#)). In the second fiscal year of the Administration, agencies have continued to achieve substantial regulatory reform, exceeding the requirements of Executive Order 13771.

- Eliminated \$23 billion in overall regulatory costs across the government, far exceeding the \$11 billion projected.
- 12 to 1: Agencies issued 176 deregulatory actions and 14 significant regulatory actions.
- 57 deregulatory actions were significant. Comparing significant deregulatory actions to significant regulatory actions yields a ratio of 4 to 1.

All accounting below uses the present value, as of 2018, of the costs or cost savings achieved. For a detailed list of regulatory and deregulatory actions completed in Fiscal Year 2018, see this [chart](#). Executive Order 13771 implementation is further explained in the Office of Management and Budget Guidance [M-17-21](#). For questions about specific regulatory actions, please contact the relevant agency.

*Executive Order 13771 Regulatory and Deregulatory Actions* . Executive Order 13771 regulatory actions are defined as those final actions that both impose costs greater than zero and qualify as “significant” under Section 3(f) of Executive Order 12866 (see [M-17-21](#), Q2). Accordingly, the regulatory actions listed in this table represent a subset of an agency’s total regulatory actions. Executive Order 13771 deregulatory actions are defined as any final action that has total costs less than zero (see [M-17-21](#), Q4). Inclusion of a range of deregulatory actions incentivizes agencies to consider modifying or eliminating unnecessary burdens, whether large or small, and is related to similar conventions used in Canada and the United Kingdom in their successful reform efforts.

*Accounting Methods under Executive Order 13771* . In order to ensure consistent and comparable accounting, the Office of Information and Regulatory Affairs has worked with agencies to apply the same analytical assumptions to the costs of regulatory actions and to the cost savings of deregulatory actions. [Accounting Methods under Executive Order 13771](#) explains the technical details.

*Annualized Value v. Present Value* . The above chart uses the present value of regulatory and deregulatory actions. Annualized value and present value are different forms of the same summary numbers. With a perpetual time horizon and a 7 percent discount rate, a present value can be transformed into its contemporaneous annualized value by multiplying by 0.07.
