FOR FURTHER INFORMATION CONTACT: Marissa Gordon-Nguyen at (800) 368-1019 or (800) 537-7697 (TDD).

SUPPLEMENTARY INFORMATION: The Department proposed a “Rulemaking (NPRM) to modify the Standards for the Privacy of Individually Identifiable Health Information (Privacy Rule) under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) and the Health Information Technology for Economic and Clinical Health Act of 2009 (HITECH Act),” to solicit public comments on proposed modifications to the HIPAA Privacy Rule to support individuals’ engagement in their health care, remove barriers to coordinated care, and decrease regulatory burdens on the health care industry while continuing to protect individuals’ health information privacy interests. The Office of the Federal Register (OFR) posted the HIPAA NPRM on the **Federal Register** website for public inspection on January 19, 2021. OFR published the HIPAA NPRM in the **Federal Register** for public comment on January 21, 2021.

On January 20, 2021, the White House published a memorandum “Regulatory Freeze Pending Review” at <https://www.whitehouse.gov/briefing-room/presidential-actions/2021/01/20/regulatory-freeze-pending-review/> (the Regulatory Freeze Memorandum). The Regulatory Freeze Memorandum directs the heads of Executive Departments and Agencies to refrain from issuing new

proposed or final rules, to withdraw rules pending publication with OFR, and to consider postponing for 60 days from the date of the memorandum, the effective date of rules already published in the **Federal Register**. The purpose of the memorandum is to implement the President's plan to manage the Federal regulatory process at the outset of the Administration by providing the opportunity for the President's new designees or appointees to review all new and pending rules.

Because OFR published the HIPAA NPRM prior to the effective withdrawal of rules provided for in the memorandum, the HIPAA NPRM remains publicly available in the **Federal Register** and open for public comment. However, due to the proximity in time between the publication of the HIPAA NPRM and the Regulatory Freeze Memorandum, the public may need clarification that the HIPAA NPRM is available for public comment and additional time to review the proposals and submit comments.

Therefore, to maximize the opportunity for the public to provide meaningful input to inform policy development, the Department is extending the comment period to May 6, 2021.

Norris Cochran,

Acting Secretary, Department of Health and Human Services.

47 CFR Part 73

[MB Docket No. 21-9; RM-11872; DA 21-40; FRS 17397]

Television Broadcasting Services Tulsa, Oklahoma

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has before it a petition for rulemaking filed by KTUL Licensee, LLC, (Licensee), licensee of KTUL, channel 10, Tulsa, Oklahoma, requesting the substitution of channel 14 for channel 10 at Tulsa in the DTV Table of Allotments. The Licensee states that the Commission has recognized that VHF channels have certain propagation characteristics which may cause reception issues for some viewers, and also that reception of VHF signals require larger antennas that are generally not well suited to the mobile

applications expected under flexible use, relative to UHF channels. KTUL has received numerous complaints from viewers unable to receive the Station's over-the-air signal, despite being able to receive signals from other stations. Licensee further states that with respect to operations on channel 14 and nearby land mobile services, it has determined that it can install the appropriate mask filter and antenna needed to avoid interference to land mobile operations. In addition, operation on channel 14 will not result in any predicted loss of service and would result in a substantial increase in signal receivability for KTUL viewers.
