

Top 5 Office Systems Implemented to Promote HPV Immunization (n=62)

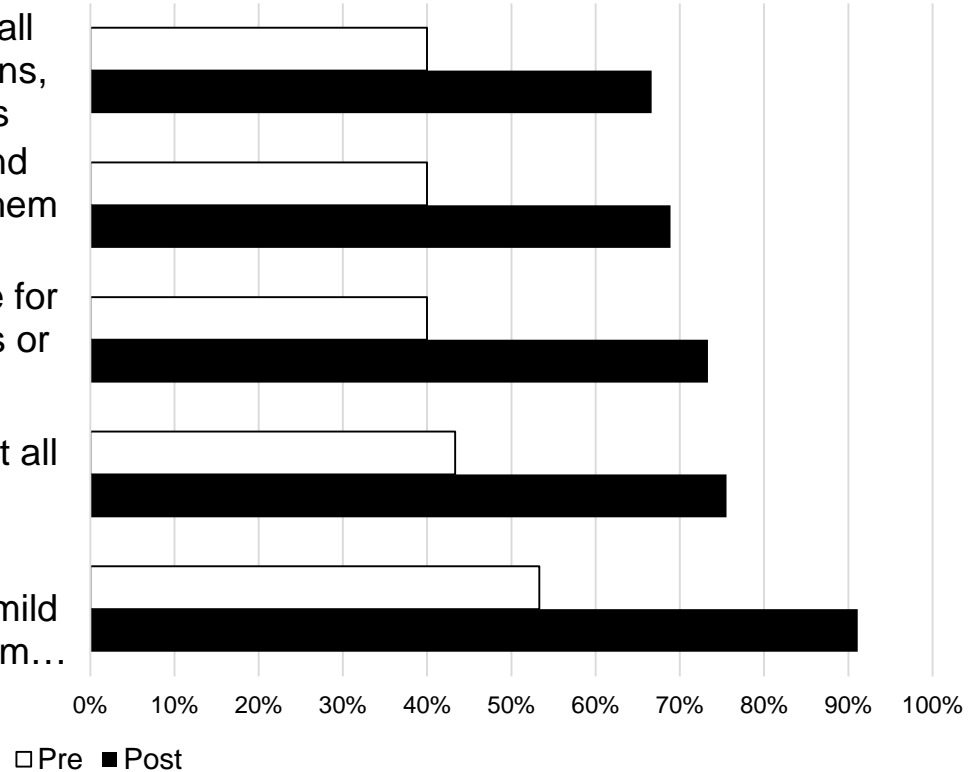

We have delegated a 'clinic champion' to keep all clinic staff up-to-date on current recommendations, discuss immunization policy at office meetings

If adolescent patients miss well care visits and cannot be rescheduled quickly, we schedule them for 'shot only' visits

We flag incoming adolescent patients due for immunizations through the EMR, insurers or immunization registry

We assess the patient's vaccination status at all well checks and sick visits

We ensure that office policies allow HPV vaccination at all visits, including those for a mild illness, and follow-ups, and our practice team...

Missed Opportunities by Visit Type (62 practices)

Visit Type	Number of Visits Audited	Percent of MO by Visit Type		Percent Change
		Pre-Project Median	End-Project Median	
Well Care	2948	56.9%	40.4%	-29.0%
Acute	2504	94.7%	84.6%	-10.7%
Chronic Care	547	83.7%	82.7%	-1.2%
Nurse Only	1379	56.0%	33.8%	-39.6%
Other*	753	76.0%	64.4%	-15.3%
Total (all visit types)	8131	74.9%	52.5%	-29.9%

*Other visit types included follow-up visits, medicine checks, asthma checks, etc.
