Name:

Congenital Anomaly Surveillance Electronic System (CASES)

PIA Unique Identifier:
P-9865575-294487

The subject of this PIA is which of the following?
Minor Application (child)

Identify the Enterprise Performance Lifecycle Phase of the system.
Operations and Maintenance

Is this a FISMA-Reportable system?
No

Does the system include a Website or online application available to and for the use of the general public?
No

Identify the operator.
Agency

Is this a new or existing system?
New

Does the system have Security Authorization (SA)?
Yes

Indicate the following reason(s) for updating this PIA.

Describe the purpose of the system.
The system is used for surveillance and monitoring of a population-based on child birth defects in a defined geographical area around Atlanta.

Describe the type of information the system will collect, maintain (store), or share.
birth defects surveillance - includes demographics, clinical signs and symptoms, detailed defect diagnoses, medical procedures, test/laboratory results, maternal risk factors (medications, smoking, etc.), medical care received, and types of treatment and intervention.

Provide an overview of the system and describe the information it will collect, maintain (store), or share,
MACDP is a population-based surveillance program which monitors birth defects in a defined geographic area around Atlanta. MACDP has been collecting, analyzing and interpreting birth defects surveillance data since 1968.

Data are identified by medically trained abstractors at birth hospitals, pediatric hospitals, laboratories, prenatal clinics, and other sources.

Does the system collect, maintain, use or share PII?
No
