

I. Background

The National Vaccine Program Office (NVPO) is located within the Office of the Assistant Secretary for Health (OASH), Office of the Secretary, U.S. Department of Health and Human Services. NVPO provides leadership and fosters collaboration among the various Federal agencies involved in vaccine and immunization activities. These coordinated efforts are aimed to achieve the strategic goals outlined in the National Vaccine Plan. The National Vaccine Plan provides a framework, including goals, objectives, and strategies, for pursuing the prevention of infectious diseases through immunizations. The NVPO also supports the National Vaccine Advisory Committee (NVAC). The NVAC advises and makes recommendations to the Assistant Secretary for Health (ASH) in his capacity as the Director of National Vaccine Program on matters related to vaccine program responsibilities.

In response to historically low influenza vaccination rates in healthcare personnel, the ASH charged NVAC with developing recommended strategies for annually achieving 90% influenza vaccination coverage among healthcare personnel, as stated in the Healthy People 2020 goals. The Healthcare Personnel Influenza Vaccination Subgroup (HCPIVS), a subgroup of the NVAC Adult Immunization Working Group (AWIG), was established to address this charge on behalf of the NVAC. The HCPIVS consists of a broad range of stakeholders including representatives from a variety of medical and public health agencies and professional organizations. The HCPIVS members have deliberated on a number of scientific findings, position statements, and presentations that examine issues pertaining to influenza vaccination in healthcare personnel. Through discussion and careful review, the HCPIVS has developed draft recommendations for consideration by the NVAC to achieve the charge, as noted above.

The draft report describes the importance of influenza as a public health issue, the importance of protecting vulnerable patients from influenza infection, and the importance of influenza immunization as part of a comprehensive influenza infection control program for protecting both healthcare personnel and patients against influenza infections. From these findings and conclusions, HCPIVS has developed draft recommendations that support strategies which have shown success in improving influenza

vaccination coverage among healthcare personnel.

NVPO is seeking comments on these draft recommendations from a variety of stakeholders, including the general public, for consideration by the NVAC as they develop their final recommendations to the ASH. Comments received will be available for public viewing on the NVAC Healthcare Personnel Influenza Vaccination Subgroup site located on the NVPO Web site http://www.hhs.gov/nvpo/nvac/subgroups/healthcare_personnel_influenza_vacc_subgroup.html.

II. Request for Comment

NVPO, on behalf of the NVAC Healthcare Personnel Influenza Vaccination Subgroup, requests input on the draft report and draft recommendations http://www.hhs.gov/nvpo/nvac/subgroups/healthcare_personnel_influenza_vacc_subgroup.html.

In addition to general comments, NVPO is seeking input on additional proven strategies and/or potential barriers to achieving the Healthy People 2020 annual goal of 90% influenza vaccine coverage among healthcare personnel that are not addressed in the NVAC Healthcare Personnel Influenza Vaccination Subgroup draft report and draft recommendations. Please limit comments to 6 pages.
