Federal Policy for the Protection of Human Subjects: Delay of the Revisions to the Federal Policy for the Protection of Human Subjects

AGENCY: Department of Homeland Security; Department of Agriculture; Department of Energy; National Aeronautics and Space Administration; Department of Commerce; Consumer Product Safety Commission; Social Security Administration; Agency for International Development; Department of Labor; Department of Defense; Department of Education; Department of Veterans Affairs; Environmental Protection Agency; Department of Health and Human Services; National Science Foundation; and Department of Transportation.

ACTION: Interim final rule; delay of effective and compliance dates; request for comments.

SUMMARY: In a final rule published on January 19, 2017, federal departments and agencies listed in this document made revisions to the Federal Policy for the Protection of Human Subjects. The Consumer Product Safety Commission (CPSC) adopted the same regulatory changes in a separate final rule published on September 18, 2017. The revised policy, reflected in both final rules, is described here as the "2018 Requirements." The 2018 Requirements are scheduled to become effective on

January 19, 2018, with a general compliance date of January 19, 2018 (with the exception of the revisions to the cooperative research provision).

This interim final rule delays the effective date and general compliance date of the 2018 Requirements to July 19, 2018. The federal departments and agencies listed in this document are in the process of developing a proposed rule to further delay implementation of the 2018 Requirements. The limited implementation delay accomplished by this interim final rule both provides additional time to regulated entities for the preparations necessary to implement the 2018 Requirements, and additional time for the departments and agencies listed in this document to seek input from interested stakeholders through a notice and comment rulemaking process that allows for public engagement on the proposal for a further implementation delay.

DATES: This interim final rule is effective on July 19, 2018. This interim final rule delays until July 19, 2018, the effective date and general compliance date of the final rule published in the **Federal Register** (82 FR 7149, Jan. 19 2017) and of the final rule published by the Consumer Product Safety Commission in the **Federal Register** (82 FR 43459, Sept. 18, 2017). To be assured consideration, comments must be received at one of the addresses provided below, no later than 11:59 p.m. Eastern Standard Time on March 19, 2018.

SUPPLEMENTARY INFORMATION:

I. Background

On September 8, 2015, HHS and 15 other federal departments and agencies published a Notice of Proposed Rulemaking (NPRM) proposing revisions to each agency's codification of the Federal Policy for the Protection of Human Subjects, originally promulgated as a Common Rule in 1991. 80 FR 53931. On January 19, 2017, HHS and other federal departments and agencies published a final rule revising the Federal Policy for the Protection of Human Subjects. 82 FR 7149. The revised policy is hereafter referred to as the "2018 Requirements." The 2018 Requirements are scheduled to become effective on January 19, 2018, with a general compliance date of January 19, 2018 (with the exception of the revisions to the cooperative research provision at § .114(b), for which the compliance date is January 20, 2020).

After publication of the 2018 Requirements, representatives of the regulated community, including organizations representing recipients of federal human subjects research awards, expressed concern regarding the regulated community's ability to implement all of the 2018 Requirements by the scheduled general compliance date.¹ Some of these stakeholders asked for a delay in the general compliance date of the 2018 Requirements with the exception of certain burden-reducing provisions of the 2018 Requirements, including certain carve-outs from the definition of "research," exemptions, elimination of the continuing review

requirement for certain categories of research, and the elimination of the requirement that institutional review boards (IRBs) review grant applications. The HHS Secretary's Advisory Committee on Human Research Protections (SACHRP) also recommended in August 2017 that implementation of the 2018 Requirements should be delayed.²

II. Delay of the Effective Date and General Compliance Date

Through this interim final rule, we are delaying the effective date and the general compliance date of the 2018 Requirements for six months, until July 19, 2018. As described below, we revise § .101(l)(3)-(4) to specify that the general compliance date for the 2018 Requirements is July 19, 2018.

Prior to July 19, 2018, regulated entities will continue to comply with the pre-2018 Requirements and those requirements will be enforced by the Common Rule departments and agencies. To clarify, regulated entities are not allowed, prior to July 19, 2018, to comply with the 2018 Requirements in lieu of the pre-2018 Requirements. Unless further regulatory action is taken, studies initiated on or after July 19, 2018, will be required to comply with the 2018 Requirements. Studies initiated prior to July 19, 2018 (*i.e.*, studies initially approved by an IRB, studies for which IRB review was waived pursuant to § .101(i), or studies determined to be exempt, before July 19, 2018) would, as a default, continue to be subject to the pre-2018 Requirements for their duration. This will maintain the ability of institutions to hold such studies to the same set of standards throughout the studies' duration, and will avoid a requirement that such research be subject to two sets of rules. However, on or after July 19, 2018, institutions may elect instead to conduct such studies in compliance with the 2018 Requirements, as set forth in § .101(l)(3).

This interim final rule does not delay the compliance date for the cooperative research provision of the 2018 Requirements (§ .114(b)), which remains January 20, 2020.

III. Good Cause for Interim Final Rule

Under Section 553(b) of the Administrative Procedure Act (APA) (5 U.S.C. 551 *et seq.*), a notice of proposed rulemaking is not required when an agency, for good cause, finds that notice and public comment thereon are

² SACHRP Recommendations of August 2, 2017, Attachment A: <https://www.hhs.gov/ohrp/sachrp-committee/recommendations/attachment-a-august-2-2017/index.html>.

impracticable, unnecessary, or contrary to the public interest. Pursuant to 5 U.S.C. 553(b)(3)(B), we find that good cause exists to waive normal rulemaking requirements for the delay of the effective date and general compliance date to July 19, 2018. We believe that a notice-and-comment procedure, in this limited instance, is impracticable, unnecessary, or contrary to the public interest.

Representatives of the regulated community, and HHS's own advisory committee, have requested a delay in implementation of the 2018 Requirements, citing the final rule's complexity, the absence of needed guidance, and the need to revamp institutional procedures and electronic systems in order to come into compliance with the requirements of the rule. We agree that regulated entities need additional time for implementation and compliance, which would be furthered by the issuance of guidance by the Common Rule agencies. Without a delay, and without guidance, institutions that have expected a delay who hastily attempt to implement the revised rule without adequate preparation are bound to make mistakes, the consequences of which may jeopardize the proper conduct of research and the safety and wellbeing of human subjects. At this point, it is impracticable to gather comments on an implementation delay prior to January 19, 2018, the scheduled effective date of the 2018 Requirements.

In addition, the benefits underlying this interim final rule, *i.e.*, providing certainty to entities in the regulated community that they will be afforded additional time before being subject to compliance with the 2018 Requirements prior to the date such requirements are scheduled to go into effect, would be substantially undermined if a notice and comment process were to occur before the delay set forth in this interim final rule was finalized. For example, we understand that regulated entities may need to devise new policies and procedures and new information technology systems to accommodate the 2018 Requirements in advance of the applicable effective and compliance date. In addition, the effect of this interim final rule is simply to maintain the status quo by continuing to require compliance with the pre-2018 Requirements for several months.

Further, the federal departments and agencies named in this interim final rule are developing a notice of proposed rulemaking in order to fully engage regulated entities and the public regarding further delay of the 2018 Requirements until January 21, 2019.

The additional time provided by the six month delay in this interim final rule will allow sufficient time for the notice and comment rulemaking process to be completed. Issuance of this interim final rule avoids the possible result of having the federal departments and agencies propose an implementation delay but be unable to complete the rulemaking process and publish a final rule that would be effective by January 19, 2018. This could have resulted in the absurd circumstance in which regulated entities would be technically required to come into compliance with the 2018 Requirements on January 19, 2018, only until the date a final rule implementing the delay became effective. In this unique circumstance, allowing the regulation to become effective while further rulemaking for delay is ongoing would create confusion for, and impose unnecessary burdens on, the regulated community.

We also find that good cause exists for immediate implementation of this interim final rule and waiver of the 30-day delay in the effective date generally required by the APA. The APA provides that an agency is not required to delay the effective date when the agency, for good cause, finds that the requirement is impracticable, unnecessary, or contrary to the public interest (5 U.S.C. 553(d)(3)). Given the reasons identified above for the good cause to dispense with notice and comment, we believe that this requirement is also met here. Further, the 30-day delay in the effective date is normally intended to give affected parties time to adjust their business practices and make preparations before a final rule takes effect. Because the action being taken delays the effective date to July 19, 2018 and thus maintains the status quo, an additional 30-day delay of this action is unnecessary.

Department of Homeland Security

The rule issued by the Department of Homeland Security (DHS) is consistent with section 8306 of Public Law 108–458, the Intelligence Reform and Terrorism Prevention Act of 2004, under which DHS shall comply with 45 CFR part 46 or equivalent regulations issued by DHS; continued adherence to the HHS standard best ensures that DHS does not lose critical research opportunities as a result of inconsistent federal standards. The DHS rule is also consistent with DHS's waiver authority under forthcoming 6 CFR 46.101(i), as well as the exemption at 5 U.S.C. 553(a)(2) for rules related to “loans, grants, benefits, or contracts.”

Department of Education

Continued adherence to the HHS standard protects the Department of Education (ED) from the potential loss of critical research opportunities as a result of inconsistent federal standards. The ED rule is also consistent with ED's waiver authority under 34 CFR 97.101(i).

V. Regulatory Impact Analyses

We have examined the effects of this interim final rule under Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017), the Paperwork Reduction Act of 1995 (Pub. L. 104–13), the Regulatory Flexibility Act, (Pub. L. 96–354, September 19, 1980), the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), and Executive Order 13132 on Federalism (August 4, 1999).

A. Executive Orders 12866, 13563, and 13771

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects; distributive impacts; and equity). Executive Order 13563 is supplemental to and reaffirms the principles, structures, and definitions governing regulatory review as established in Executive Order 12866, emphasizing the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. In accordance with the provisions of Executive Order 12866, this interim final rule has been determined to be a “significant” regulatory action and was submitted to the Office of Management and Budget (OMB) for review.

Executive Order 13771 directs Agencies to identify at least two existing regulations to be repealed for every new regulation unless prohibited by law. The total incremental cost of all regulations issued in a given fiscal year must have costs within the amount of incremental costs allowed by the Director of the Office of Management and Budget, unless otherwise required by law or approved in writing by the Director of the Office of Management and Budget. This action's designation as regulatory or deregulatory will be informed by comments received in response to this interim final rule. Details on the interim estimates of costs and cost savings of this rule can be found in the economic analysis below.

1. Need for Final Rule and Summary

This interim final rule is intended to provide additional time to regulated entities for the preparations necessary to implement the 2018 Requirements. This interim final rule further allows time for the federal departments and agencies named in this interim final rule to conduct a notice and comment rulemaking process that will allow for public engagement as to whether a further delay in the implementation of the 2018 Requirements would be desirable.

2. Analysis of Benefits (Cost-Savings) and Costs (Foregone Benefits)³

The RIA for the 2018 Requirements described the benefits and costs of 16

broad categories of changes finalized. The RIA for this interim final rule uses the information and calculations described in the preamble to the 2018 Requirements as a base for estimating benefits and costs of delaying implementation of the 2018 Requirements by six months. The time

period for the analysis in this RIA is January 2018 to July 2018. Table 1 summarizes the quantified costs and cost savings of delaying implementation of 2018 Requirements. Over the period of January 2018 to July 2018, annualized cost savings of \$7.4 million are estimated using a 3 percent discount rate; and \$6.9 million using a

7 percent discount rate. Annualized costs of \$49.5 million are estimated using a 3 percent discount rate; and \$45.9 million using a 7 percent discount rate. Note that all values are represented in millions of 2016 dollars, and 2016 is used as the frame of reference for discounting.

⁴ Zeroes in Table 2 (represented by “—”) signify that the category has been unaffected by the six month delay of the 2018 Requirements, The category could be unaffected for one of two reasons: (1) No costs or benefits were associated with the category in the RIA for the 2018 Requirements; or (2) the costs and benefits of the provision during the six month delay are the same as those estimated in the RIA for the 2018 Requirements.

⁵ Because compliance with this provision is not required until 2020, benefits and costs here are not included.

Similarly, the terms “costs” and “foregone benefits” are also used interchangeably.

We assume that, in almost all categories described in the RIA for the 2018 Requirements, the foregone benefits (costs) of delaying the 2018 Requirements by six months are what would have been the benefits of implementing the 2018 Requirements during the period of January through July of 2018. Similarly, we assume that, in almost all categories described in the RIA for the 2018 Requirements, the benefits (cost-savings) associated with delaying the 2018 Requirements by six months are what would have been the costs of implementing the 2018 Requirements during the period of January through July of 2018. We assume this because these categories generally would not have required significant guidance from Common Rule departments or agencies in order to implement the provisions, and thus could have been implemented as assumed in the economic analysis contained in the RIA for the 2018 Requirements.

The exceptions to the above assumption relate to two RIA categories: (1) Excluding activities from the Common Rule because they are not research; and (2) the expansion of research activities exempt from full IRB review. The 2018 Requirements include four explicit categories of activities that have been deemed not research for the purposes of the Common Rule. In the absence of guidance, it would be difficult for institutions to fully take advantage of the exclusion of activities from the definition of research; therefore we now assume that many institutions would not have used these categories without guidance.

The 2018 Requirements also include five new exemption categories, and modify all but one exemption that exists in the pre-2018 Requirements. We have received feedback from SACHRP that many of the exemption categories will require significant guidance in order to be implemented.⁶ Areas where significant guidance is needed include: Applying the categories of the new exemptions themselves, conducting limited IRB review (as required in four exemptions), developing and using broad consent (as required in two exemptions), utilizing the exemption for certain HIPAA covered activities, and understanding which federally supported or conducted nonresearch information collections qualify for exemption.

Because the guidance necessary to implement these provisions has not yet been developed, we now assume that 50 percent of the regulated entities would not have taken advantage of the expansion in exemptions or the revised definition of research during the six-month delay. For these entities, we assume that there are no benefits and costs of the proposed delay, because they would not have changed their operations. We assume that 50 percent of the regulated entities would have gone forward with using the new or expanded exemption categories under the 2018 Requirements; for these entities, there are costs of delaying the implementation of this provision during the six-month delay of this interim final rule. We are seeking comment on these assumptions.

B. Paperwork Reduction Act (PRA)

This interim final rule does not impose any additional information collection burden under the PRA, and does not contain any information collection activities beyond the information collection already approved by OMB under control number 0990–0260.

C. Regulatory Flexibility Act (RFA)

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) (RFA) and the Small Business Regulatory Enforcement Fairness Act of 1996, which amended the RFA, require agencies that issue a regulation to analyze options for regulatory relief for small businesses. If a rule has a significant impact on a substantial number of small entities, agencies must specifically consider the economic effect of the rule on small entities and analyze regulatory options that could lessen the impact of the rule. The RFA generally defines a “small entity” as (1) a proprietary firm meeting the size standards of the Small Business Administration (SBA); (2) a nonprofit organization that is not dominant in its field; or (3) a small government jurisdiction with a population of less than 50,000 (states and individuals are not included in the definition of “small entity”). HHS considers a rule to have a significant economic impact on a substantial number of small entities if at least 5 percent of small entities experience an impact of more than 3 percent of revenue.

This action does not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant

economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden or otherwise has a positive economic effect on the small entities subject to the rule. This interim final rule does not impose a regulatory burden for regulated small entities because it delays the effective date and general compliance date of the 2018 Requirements, allowing the status quo to be retained for the period of delay. We have, therefore, concluded that this action will have no net regulatory burden for all directly regulated small entities.

D. Unfunded Mandates Reform Act (UMRA)

Section 202(a) of the Unfunded Mandates Reform Act of 1995 requires that agencies prepare a written statement, which includes an assessment of anticipated costs and benefits, before proposing “any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more (adjusted annually for inflation) in any one year.” The current threshold after adjustment for inflation is \$148 million, using the most current (2016) implicit price deflator for the gross domestic product. We do not expect this interim final rule to result in expenditures that will exceed this amount. This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments.

E. Executive Order 13132: Federalism

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a rule that imposes substantial direct requirement costs on state and local governments or has federalism implications. We have determined that the interim final rule does not contain policies that have substantial direct effects on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities among the various levels of government. The changes to the 2018 Requirements contained in this interim final rule represent the Federal Government regulating its own program. Accordingly, we conclude that the interim final rule does not contain policies that have federalism implications as defined in Executive Order 13132 and, consequently, a federalism summary impact statement is not required.

⁶ SACHRP Recommendations of August 2, 2017: <https://www.hhs.gov/ohrp/sachrp-committee/recommendations/sachrp-recommendations/index.html>.

For the reasons set forth in the preamble, the Federal Policy for the Protection of Human Subjects, as published in the **Federal Register** on January 19, 2017 (82 FR 7149) and as adopted in a final rule published by the CPSC on September 18, 2017 (82 FR 43459), this common rule is further amended as follows:

Text of the Amended Common Rule

PART —PROTECTION OF HUMAN SUBJECTS

■ 1. Amend § .101 by revising paragraphs (l)(3) and (4) to read as follows:

§ .101 To what does this policy apply?

* * * * *

(l) * * *

(3) Research initially approved by an IRB, for which such review was waived pursuant to § .101(i), or for which a determination was made that the research was exempt before July 19, 2018, shall comply with the pre-2018 Requirements, except that an institution engaged in such research on or after July 19, 2018 may instead comply with the 2018 Requirements if the institution determines that such ongoing research will comply with the 2018 Requirements and an IRB documents such determination.

(4) Research initially approved by an IRB, for which such review was waived pursuant to § .101(i), or for which a determination was made that the research was exempt on or after July 19, 2018, shall comply with the 2018 Requirements.

14 CFR Part 39

[Docket No. FAA–2018–0023; Product Identifier 2017–NM–084–AD; Amendment 39–19164; AD 2018–02–11]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain Airbus Model A330–301, –321, –322 and –342 airplanes. This AD requires contacting the FAA to obtain instructions for addressing the unsafe condition on these products, and doing the actions specified in those instructions. This AD was prompted by a report of cracking in the top skin of the horizontal stabilizer (HS) center box (CB) of an airplane in pre-modification 41330 configuration. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD becomes effective February 6, 2018.

We must receive comments on this AD by March 8, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- **Federal eRulemaking Portal:** Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- **Fax:** 202–493–2251.

- **Mail:** U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- **Hand Delivery:** U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2018–0023; or in person at the Docket Operations office between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2017–0078, dated May 3, 2017 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for certain Airbus Model A330–301, –321, –322 and –342 airplanes. The MCAI states:

Cracks were found in the horizontal stabilizer (HS) centre box (CB) top skin of an aeroplane in pre-modification 41330 configuration. The cracks were initiated at the upper flange corner at Rib 3 rear spar area on left hand side of the CB.

This condition, if not detected and corrected, could lead to reduced structural integrity of the HS CB of the aeroplane.

To address this unsafe condition, Airbus published Service Bulletin (SB) A330–55–3046 to provide inspection instructions for the affected area.

For the reason described above, this [EASA] AD requires a one-time special detailed inspection (SDI) of the HS CB top
