<b>PTA - 8:</b>	Please give a brief overview and purpose of the system by describing what the functions of the system are and how the system carries out those functions?	The Health Resources and Services Administration Ethics Reporting Database (HERD) houses Ethics Program data and

documents that have been housed in Excel logs and a shared drive. The database allows for storage of ethics forms, reports, and advice all in one place and allows HRSA Ethics Program staff to run reports on employee compliance with HRSA Ethics Program requirements. The reports also provide information on HRSA's compliance with the Departmental Ethics Program requirements. The Ethics Program is a preventative program that requires certain agency employees to file financial disclosure and outside activity reports, as well as request prior approval for certain types of outside activities. The forms used for these purposes, as well as correspondence regarding them and ethics rules/regulations inquiries, are stored in this database. Many of the program requirements have regulatory deadlines and employee and staff actions must be monitored to ensure those deadlines are being met. The reporting capabilities of this system allow for that monitoring activity.

<b>PTA - 9:</b>	List and/or describe all the types of information that are collected (into), maintained, and/or shared in the system regardless of whether that information is PII and how long that information is stored.	The database collects and stores employee ethics data, such as dates of interaction with program staff and when and how employees met compliance requirements of the HRSA Ethics Program. The system houses documents submitted by employees for review/approval, as well as advice provided by the HRSA Ethics Program staff to agency employees. Forms and reports stored in the system or with links in the system to them include the (Office of Government Ethics) OGE Form 278 Public Financial Disclosure Report, 450 Confidential Financial Disclosure Report, HHS 520 Request for Approval of Outside Activity, HHS 521 Annual Report of Outside Activity and 18 USC 208(b)(3) conflict of interest waivers and recusals notifications.  These documents collect employee information including name; position; address; phone number; e-mail; supervisor name and contact information; salary and grade information; descriptions of financial holdings of employee, spouse, and dependent children; sources of income; outside financial relationships; other outside relationships with non-Federal entities and individuals; and advice based on ethics statutes and regulations that have been provided to employees by HRSA Ethics staff.
<b>PTA - 9A:</b>	Are user credentials used to access the system?	Yes

<b>PTA - 10:</b>	Describe why all types of information is collected (into), maintained, and/or shared with another system. This description should specify what information is collected about each category of individual	The system is a database, searchable by HRSA Ethics Program staff. It houses all HRSA Ethics Program data and documents relative to HRSA

employees and their compliance with the agency ethics program. The system has reporting capabilities for ethics program compliance monitoring. Forms and reports stored in the system or with links in the system to them include the OGE Form 278 Public Financial Disclosure Report, 450 Confidential Financial Disclosure Report, HHS 520 Request for Approval of Outside Activity, HHS 521 Annual Report of Outside Activity and 18 USC 208(b)(3) conflict of interest waivers and recusals notifications. These documents collect employee information including name; position; address; phone number; e-mail; supervisor name and contact information; salary and grade information; descriptions of financial holdings of employee, spouse, and dependent children; sources of income; outside financial relationships; other outside relationships with non-Federal entities and individuals; and advice based on ethics statutes and regulations that have been provided to employees by HRSA Ethics staff. The documents stored in the system are maintained as individual ethics folders for each HRSA employee. Most of the financial disclosure reports are stored in systems maintained by the HHS Office of General Counsel and the Office of Government Ethics. The HERD maintains links to those other systems so the HRSA Ethics staff can quickly retrieve the ethics forms in those system while working all within the HERD. The HERD collects data for those systems for compliance reporting purposes. Agency employee ethics records are required to be maintained for six years before being destroyed. HERD also purges documents that are no longer required to be maintained by the (National Archives and Records Administration) NARA records schedule governing Executive Branch Ethics records.
