

# The Federal Strategy for Animal Surveillance, Information Sharing, and Disseminating Guidance

Michael Neafsey

One Health Coordinator

USDA APHIS Veterinary Services

September 12, 2022

United States Department of Agriculture

# One Health Networking

- Common infections
- Field Operations
- Commodity Staffs
- One Health Coordination

# IAV-S Surveillance

- APHIS surveillance objectives:
  - Monitor genetic evolution of endemic IAV;
  - Make influenza isolates from swine available for research and establish a data management system
  - Select proper isolates for the development of relevant tools
- Collaborative multi-sector approach
- Laboratory networks

# Information Sharing

- Local Focus
- Biosecurity
