on Heritable Disorders in
Newborns and Children

NET BENEFIT/ CERTAINTY		READINESS			FEASIBILITY	
		Ready	Developmental	Unprepared	Feasibility	HIGH or MODERATE LOW
SIGNIFICANT Benefit	Certainty HIGH	A1 Screening for the condition has a high certainty of significant net benefits, screening has high or moderate feasibility. Most public health departments are ready to screen.	A2 Screening for the condition has a high certainty of significant net benefits and screening has high or moderate feasibility. Public health departments have only developmental readiness.	A3 Screening for the condition has a high certainty of significant net benefits and screening has high or moderate feasibility. Public health departments are unprepared for screening.		
		A4 There is high certainty that screening would have a significant benefit; however, most health departments have low feasibility of implementing population screening.				
		MOD	B 1-4 There is moderate certainty that screening would have a significant benefit.			
Small to ZERO Benefit	Certainty MOD/HIGH	C 1-4 There is high or moderate certainty that adoption of screening for the targeted condition would have a small to zero net benefit.				---
NEG Benefit		D 1-4 There is high or moderate certainty that adoption of screening for the targeted condition would have a negative net benefit.				---
---		LOW	L 1-4 There is low certainty regarding the potential net benefit from screening.
