

**Indivior Inc. REMS Restricted Distribution Network for SUBLOCADE®
(buprenorphine extended-release) injection, for subcutaneous (SC) use CIII**

March 2020

This notice provides information for 340B covered entities about the restricted distribution network through which SUBLOCADE (buprenorphine extended-release) injection, for subcutaneous (SC) use CIII is available.

12496-0100-01	SUBLOCADE 100mg/0.5ml
12496-0300-01	SUBLOCADE 300mg/1.5 ml

SUBLOCADE is indicated for the treatment of moderate to severe opioid use disorder in patients who have initiated treatment with a transmucosal buprenorphine-containing product, followed by dose adjustment for a minimum of seven days. SUBLOCADE is available only through the SUBLOCADE Risk Evaluation and Mitigation Strategy (“REMS”) because of the risk of serious harm or death that could result from patient intravenous self-administration. Indivior has adopted a restricted distribution network to support the implementation of the SUBLOCADE REMS.

REMS-certified healthcare settings (e.g., individual prescriber offices or institutions), including 340B covered entities, with a DEA registration may purchase SUBLOCADE through Indivior’s specialty distributor network and inventory the product in the certified and registered healthcare setting. For a list of our specialty distributors, please visit www.inSupport.com. Specialty pharmacies affiliated with health systems are eligible to join the specialty pharmacy network for SUBLOCADE, if they satisfy our network inclusion criteria, which are unrelated to 340B participation. An in-network specialty pharmacy affiliated with -- and in a contract pharmacy relationship with -- a 340B covered entity may access and dispense 340B-priced medication (patient-specific prescription) to a DATA 2000-waivered healthcare provider for patient administration. For more information on how to become certified to purchase SUBLOCADE under the SUBLOCADE REMS, please visit <https://www.sublocaderems.com/>.
