

Rural Residency Planning and Development Grant Recipients

The purpose of the U.S Health Resources and Services Administration (HRSA) Rural Residency Planning and Development (RRPD) Program is to support the development of new rural residency programs in family medicine, internal medicine, psychiatry, general surgery, preventive medicine, and obstetrics and gynecology to address the physician workforce shortages and challenges faced by rural communities. Rural residency programs are accredited medical residency training programs that train residents in rural settings for greater than 50 percent of their total time in residency, and focus on producing physicians who will practice in rural communities. One common model is the 1+2 Rural Training Track (RTT), where the first year of training occurs within a larger program, typically in an urban hospital or academic medical center, and the final two years in a rural health facility.

In 2018, HRSA funded a RRPD - Technical Assistance Center (TAC) to support the development of new rural graduate medical education (GME) programs by helping rural communities overcome the significant challenges involved in designing rural programs, securing sustainable funding, and achieving accreditation. In 2019, HRSA funded 26 RRPD Programs, referred to as Cohort 1, with a program start of August 2019. In 2020, HRSA funded 10 RRPD Programs, known as Cohort 2, with a program start of September 2020. Recently, HRSA awarded 10 organizations RRPD funding to participate in Cohort 3 starting August 1, 2021. This document describes the 36 programs across Cohorts 1 and 2 (28 in family medicine, 3 in internal medicine, and 5 in psychiatry).

Practice Site Information	Benchmark Value
HPSA Code – Primary Care	0: Not HPSA: 11% (353) of non-RRPD counties 1: Whole County HPSA: 26% (835) of non-RRPD counties 2: Part County HPSA: 63% (1,995) of non-RRPD counties
Population Estimate 2017	102.842 (avg. for non-RRPD counties)
% Hispanic or Non-white 2017	24% (avg. for non-RRPD counties)
% Persons in Poverty 2017	15.30% (avg. for non-RRPD counties)
% Persons Below Poverty Level 2013-17	15.30% (avg. for non-RRPD counties)
Medicaid Eligible, Total 2012	23% (avg. for non-RRPD counties)
